## Construction Industry Technology Experts Kormoski & Associates Join ChristianSteven Software's Partner Program

*Kormoski & Associates Sees Added Value, New Opportunities with ChristianSteven CRD-Sage Timberline Office® Combination*

**Charlotte, NC, March 2, 2010** – ChristianSteven Software Ltd., provider of business automation and BI report scheduling software, welcomes 25-year construction industry experts Kormoski & Associates to their channel partner program.

“Most of our clients work in the construction industry and use Sage Timberline Office® to manage projects and jobs,” says Kormoski & Associates owner Bill Kormoski. “My clients want to know as soon as a project has issues related to budget, cost, or contract compliance, but Timberline doesn’t provide BI capabilities.”

Kormoski says other BI products work exclusively with Sage, but they don’t offer the level of sophistication that ChristianSteven does. “With the other BI packages, triggers are almost always time-related, not event-related. With ChristianSteven’s CRD software, everything is automated. You can set up a trigger and have the system send you a report the moment an event happens.”

Looking ahead, Kormoski believes the Sage Timberline/ChristianSteven CRD combination will be valuable outside the construction industry. “One of my clients use Sage Timberline Office® to manage their call center, and they need an automated, dynamic BI solution like ChristianSteven to achieve their customer service targets in a cost-efficient manner.”

“ChristianSteven is thrilled to offer their software to the construction industry through Kormoski & Associates,” says ChristianSteven channel and partner-alliances director Ken Beam. “The current economic climate has been especially hard on the construction industry, and I believe better business intelligence can be the key to their survival.”

By joining the ChristianSteven partner program, Kormoski & Associates gain exclusive access to a dedicated channel management team, pre-qualified lead generation, pre- and post-sales support, and comprehensive on-boarding package with marketing templates and prospecting support. For more information or to apply for partnership, go to <http://www.christiansteven.com/partners.html>, or contact Ken Beam at 888-781-8966 x700.

### **About Kormoski & Associates:**

Nashville, Tennessee-based Kormoski & Associates (<http://www.kormoski.com>) has dedicated more than 25 years to the construction industry. Simply put, their solutions allow clients to view the status of their business based on up-to-date, accurate information, and then share that information company-wide.

Koromoski & Associates provides installation, training, and support for Sage Timberline Office®, and other services including but not limited to web application development, data mining (reporting), business intelligence consulting, and add-on products to enhance the Sage Timberline Office® user experience and functionality.

**About ChristianSteven Software Ltd.:**

ChristianSteven Software (<http://www.christiansteven.com>) is a global supplier of business intelligence and business process automation software to more than 1,000 companies. Products are structured to ensure they can be customized and scaled to meet the needs of large multi-national companies or those with changing and expanding structures.

With locations in the USA and Europe, ChristianSteven Software's professional personnel ensure that all products and consultancy services are customer-focused and will add quantifiable, bottom-line value by giving company decision makers critical business information they need to rapidly adjust to changes in their market.
